

Daniel Felipe Vargas Pamplona

AI Solutions & Full Stack Software Engineer

ID card: 1022370888

Age: 35

Marital status: Domestic partnership

WORK EXPERIENCE

Company: Amaris Consulting, (12/05/2025-current)
Job title: AI and Data Science Developer
Immediate boss: Gabriel Montoya or Felipe Montoya
Phone number: +57 3166906035 or felipe.montoyarestrepo@amaris.com

Duties and Accomplishments:

- Designed and delivered AI, agentic, data and cloud solutions for financial and regulatory processes, combining Python, FastAPI, LLMs, RAG, prompt engineering, ETL pipelines, data lakes/lakehouse patterns and multi-cloud services across AWS, Azure and GCP. Built serverless and container-based integrations with Lambda, Step Functions, ECS, ECR, AWS Batch, S3, CloudWatch, Terraform, Azure Pipelines and Secrets, improving data classification, regulatory reporting, automated analysis and operational efficiency.

Company: SoftwareOne InterGrupo, (01/02/2022–20/03/2025)
Job title: Expert Application Development
Immediate boss: Aida Ortiz or Manuel Sandoval
Phone number: (601)5803199 or +57 3006701980

Duties and Accomplishments:

- Built a generative AI agent using GPT_RAG, with (Python, LLM, Flask, Unicorn, Quart, Prompt, React, JavaScript, Semantic Kernel, Azure, Functions, App service, AI Services, AI Foundry, Bicep, GitHub Actions, Vector Database Cosmo) for SIIGO (Accounting and administrative software). Projects such as (file upload, file review and valid formats, ad supported user generation through AI).

- Developed a project integrating external services using (Python, Java, Spring Boot, Azure, Rest and sql) for NIRSA (Prosoja). Focused on projects such as (automate uploads and optimizing internal processes for receiving, settling, and delivering seafood products and transactions).

- Project reception, new tenders, migrations, development, new functionalities, and deployments, using (Python, FastAPI, Django, Flask, MongoDB, PostgreSQL) for AFINIA (energy services company). Projects such as (Virtual billing analyst, Virtual intelligence Analysis, Virtual claims Analyst, Optimization and Maintenance of Schedules and Fraud Alarms.)

- Server administration, and development of new AI driven features, including image analysis, best selling products, statistical data analysis, data transformation, identifying trends and patterns, with (AI, NLP, OCR Optical character recognition, TQDM, NLTK, Poetry, Uvicorn, PySpark, Google Cloud > VM instances, FastApi, Power BI and MDS, Power Platform, Dataverse.) for Lucro (Alpina, Postobon) projects such as (Recognition Service).

- Support, analysis, and development of new functionalities with (Java, Oracle, Angular, Jacoco) for EPM (Medellin public companies) in projects such as (Budget capture and Contracting plan).

- Development of a new project, integrations, active directory, microservices with (Java, Spring Boot, AWS, LDAP, Rest, Soap, ChatBoot, Sql y NoSql) for CCB (Camara de comercio). projects such as (Redesign of Registration and payment, Change of Address, Board Members and Mentors, SICO, Immediate Reaction Line).

Company: Stefanini IT Solutions, (11/08/2021 – 01/02/2022)
Job title: Senior Full-Stack Software Development Engineer
Immediate boss: Lorena Pérez
Phone number: (601)7454777 or +57 3175749894

Duties and Accomplishments:

- Definition and interpretation of architecture, support in the construction and development of microservices and API's Systems and components integration, data transformation (xml to json), batch services, Pull Request Pipeline, TDD. Managements of clients and companies that contribute to and pay social security as a natural or legal person, using (Python, JavaScript, AWS, S3, EC2, RDS, WAF, Cognito, SQS, SES, Lambda, Secret Manager, DynamoDB, REST, SOAP, Jenkins, Sql Server, Oracle PL/Sql, Mocks). For projects like (Online Contributions, BBVA Bank, Occidente Banck, AvVilla Banck, Popular Bank, and Mareigua.

- Development of an application that provides insurance for workers who suffer accidents or illnesses), using (Java and Oracle), for the (Alfa Insurance) project.

PROFILE

I am a Systems Engineer with 10 years of experience designing and delivering software, data and AI solutions, with strong focus on generative AI, intelligent agents, RAG, LLM integrations, backend platforms and cloud architectures across AWS, Azure and GCP. I also hold an Associate Degree in Information Systems Analysis and Development, plus diplomas in Python AI and IoT DevNet.

I possess experience leading both team and individual projects using agile methodologies like Scrum and Kanban, as well as traditional ones, I have been involved in every stage and process, including implementation and deployment, ensuring compliance, usability, scalability, and security.

My experience spans various sectors including banking and finance, payroll and electronic invoicing, social security, travel and tourism, marketing, legal services, public and private services, freelancing, consulting, and teaching programming classes to students.

Proficiency at a professional level

English B2

Español (nativo)

BACKEND SKILLS

FRONTEND SKILLS

DATABASE SKILLS

Company: Carvajal, TyS, (21/08/2020 – 11/08/2021)
Job title: Intermediate Full-Stack Software Development Engineer
Immediate boss: Claudia Gómez or Martha Sanchez
Phone number: (601)2940673 or (601)2940850 or +57 3005303582

Duties and Accomplishments:

- As a Developer, Architecture, Analyst, Designer, Integrator, Tester, Documentation, Assessment, and Estimation of new project or requirements.
- Design, construction, and integration of the solution, implement structure, patterns, and architecture diagrams, development of microservices and APIs, Gateway, system and component integration, data transformation (Xml to Json), batch service, SSL/TLS Certificates, DIAN Service, Electronic signature, Token, Pull Request, Pipeline, using (Java Spring Boot, AWS, S3, EC2, RDS, SQS, Kubernetes, Docker, Angular, PostgreSQL, SqlServer, REST, SOAP). For the (E_BUSINESS) project (PayRoll).
- Development of a web and mobile application that allows users to register and vote for government elections, as well as view the results, fingerprint reading, barcode, using (Python, Java, Gradle, Oracle, Azure Cloud servers, Angular.) For the project (IDC Citizen election registration, Electronic voting.)

Company: GML, Aviatur(24/02/2020 – 19/06/2020)
Job title: Intermediate Full-Stack Software Development Engineer
Immediate boss: Walner Fuentes or Solangie Cortes
Phone number: (601)3907388 or +57 3057928156 or +57 3174025522

Duties and Accomplishments:

- Development of an application that allows users to purchase airline tickets, hotels, transportation, and tour packages using points that are purchased. This was achieved using microservices, service bus, and both asymmetric and symmetric cryptography, utilizing technologies such as (Java, .Net Core, Google Authentication, OAuth, SqlServer, REST, SOAP, Wsdl, Maven, Hibernate, ORM, Angular, Blazor and Razor). For the company (Aviatur), and the projects (AviaMarketing, Antojese.Travel, Davivienda.)

Company: SmartLaw TECH(16/09/2019 – 21/02/2020)
Job title: Junior Full-Stack Software Development Engineer
Immediate boss: Edwin Bernal(CEO)
Phone number: +57 3143558555 or +57 3125373544

Duties and Accomplishments:

- Development of IT solutions using Big Data and Artificial Intelligence applied to legal process management. I created cognitive, automated, and interactive technologies, also designed bots, intuitive, predictive, coherent, and reliable analysis models that contribute to problem solving through faster and more accurate decision making such as document download, background and financial statement analysis, and digital signatures. Using the technologies (Python, Java, Selenium, Core NLP, NLTK, Pandas, Google Services, Firebase, PostgreSQL, SqlServer) Projects and clients such as (robots, prozesslaw.com, Bancolombia, BBVA, Davivienda).
- I developed a web app (Control panels and alerts) for monitoring robots or automated tasks, using (Java and Angular).

Company: Novatec Solutions (17/10/2017 – 13/09/2019)
Job title: Junior Full-Stack Software Development
Immediate boss: Camilo Ramírez (CEO)
Phone number: (601)6692110 or +573204688045 or +57 3118027276

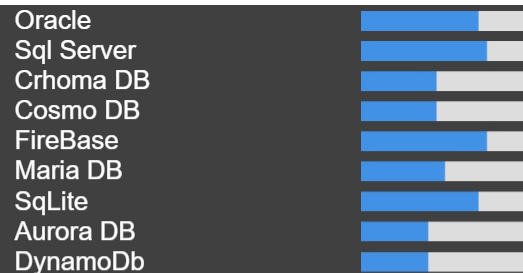

Duties and Accomplishments:

- Creation of an in_house web app for (Novatec) that facilitates financial evaluation of its customers, employees, and products, using (Java, Angular, Oracle Sql).
- Development of applications for (BBVA, MetLife, Banco Santander) to enable agile hiring of the bank's products. This involved automation, code quality and load tenting, migration from local to global, banking transactions, financial analysis and reporting, data transformation, using (microservices, REST, SOAP, WCF, Java, C#, JavaScript, continuous integrations with Jenkins, and MongoDB.)

🏠 EDUCATION

Formación académica

Systems Engineering 2020 - 2023	Universidad del Área Andina Completed. Degree awarded on 28/07/2023.
Technologist in Analysis and Development of Information Systems (ADSI) 2016 - 2019	SENA, Centro de Servicios Financieros Completed on 11/03/2019.
Programming Skills for Web Applications - Misión TIC 2022 2022	MinTIC / Universidad de Caldas Diploma completed on 12/12/2022.

☁️ CLOUD SKILLS

AWS: Lambda, S3, ECS, ECR, Batch, Step Functions, SQS, CloudWatch, IAM, Secrets Manager, API Gateway, CodePipeline.
Azure: AI Foundry, OpenAI Service, AI Services, Functions, App Service, Cosmos DB Vector Database, Azure Pipelines.
GCP: Vertex AI, Cloud Storage, Secret Manager, Auth and API services.
Cloud practices: serverless, containers, IaC with Terraform/Bicep, CI/CD, ETL, monitoring and secure secrets management.

Web Application Development - Misión TIC 2022
2022

MinTIC / Universidad de Caldas
Diploma completed on 12/12/2022.

Software Development - Misión TIC 2022
2022

MinTIC / Universidad de Caldas
Diploma completed on 09/11/2022.

Programming in Python and DevNet
2022

Universidad del Área Andina / Cisco
Diploma completed on 13/10/2022.

Basic Java Programming - Misión TIC 2022
2022

MinTIC / Universidad de Caldas
Diploma completed on 23/09/2022.

IoT Fundamentals: Connecting Things
2022

Cisco Networking Academy
Course completed on 25/07/2022.

Programming Fundamentals - Misión TIC 2022
2022

MinTIC / Universidad de Caldas
Diploma completed on 11/06/2022.

Software Quality
2017

SENA, Virtual Course
Software quality models and quality in the software development process.

High School Diploma (Bachiller Académico)
09/12/2009

Colegio Castilla, Bogotá D.C.

Certificaciones

AI Development from Zero to Production
30/08/2026

BIG School
Certificate in AI development (6 hours).

Architecting on AWS
21/10/2024 - 25/10/2024

Fast Lane, AWS Training Partner
Course completion certificate (20 hours).

AWS Cloud Practitioner Essentials
18/10/2024

Fast Lane, AWS Training Partner
Course completion certificate (9 hours).

Google Cloud Fundamentals: Core Infrastructure
23/03/2023

Google Cloud / Fast Lane
Course completion certificate.

Preparing for the Associate Cloud Engineer Examination
03/03/2023

Google Cloud / Fast Lane
Course completion certificate.

English Communication Skills Certificate (B1)
20/04/2023

TECS - ILTO
Certificate code L199433.
